

### Counting Coins

Add up each type of coin and write the total amount above the jar it goes in. Write the total amount of money

The image shows three jars, each with a red scalloped lid and a coin visible inside. The first jar contains a 25-cent coin, the second contains a 10-cent coin, and the third contains a 5-cent coin. Scattered around the jars are various Canadian coins: 25-cent, 10-cent, and 5-cent coins. There are 10 25-cent coins, 10 10-cent coins, and 10 5-cent coins scattered around the jars.
